

Exercise 2

Continue from exercise 1....

1. **Admin** controller in `index ()` function pass value to index view like below:

```
$data = [  
    'name' => 'Samnang Ros',  
    'position'=> 'IT Admin',  
    'age'=> 20,  
    'province'=> 'Banteay Mean Chey',  
    'email'=> 'samnang.ros@passerellesnumeriques.org'  
];
```

In index view will display on browser like:

- Samnang Ros
- IT Admin
- 20
- Banteay Mean Chey
- samnang.ros@passerellesnumeriques.org

2. **Admin** controller in `viewAllUsers` function pass value to **user** view like below:

```
$data = [  
    'name' => ['Ronan', 'Rady', 'Channak', 'Seiha', 'Hugo'],  
    'position'=> ['Coordinator', 'Trainer', 'Teacher', 'Manager', 'Internship'],  
    'age'=> [30, 25, 31, 40, 20],  
    'location'=> ['France', 'Cambodia', 'Cambodia', 'Cambodia', 'France']  
];
```

The user view will display on browsers like:

- Ronan , Coordinator , 30 , France
- Rady , Trainer , 25 , Cambodia
- Channak , Teacher , 31 , Cambodia
- Seiha , Manager , 40 , Cambodia
- Hugo , Internship , 20 , France

Noted: we use for loop with this array

3. **Teacher** controller in **showAttendance** function pass value to **attendance** view like below:

```
$data = [  
    'name' => array('Ronan', 'Rady', 'Channak', 'Seiha', 'Hugo'),  
    'position'=> array('Coordinator', 'Trainer', 'Teacher', 'Manager', 'Internship'),  
    'age'=> array(30, 25, 31, 40, 20),  
    'location'=> array('France', 'Cambodia', 'Cambodia', 'Cambodia', 'France')  
];
```

The attendance view will display on browsers like:

- Ronan , Coordinator , 30 , France
- Rady , Trainer , 25 , Cambodia
- Channak , Teacher , 31 , Cambodia
- Seiha , Manager , 40 , Cambodia
- Hugo , Internship , 20 , France
